# Working Chutes

## Strong, Versatile and Built to Last

Model 2000

Model 3000

The Model 3000 has all the features of the Model 2000 chute plus a palpation cage with a common floor. The palpation cage is accessible from both sides, is adjustable in width and attaches directly to Titan West's Circular Working Facility and Portable Tub Unit.

Titan West's working chute is one of the strongest working chutes available today—a heavy duty, all steel unit, built to take abuse. The frame is constructed of 2" high-strength steel tubing, with stress points reinforced for added strength and durability. The floor uses 2" x 8" rubber.©

The chute's size is large enough to handle the exotic breeds, yet versatile enough for calves, with cleats every 11" for additional traction.

**Working Chutes**

- Double Squeeze feature gently latches and firmly holds
- Crowd Ahead mechanism keeps the job moving along
- Side escape comes standard on both sides

# Working Chutes

## Working Chute Features:

- Double-Sided Width Adjustment
- Handles Most Sizes of Cattle
- Double-Action Squeeze
- Gates on both Sides of Squeeze Mechanism
- Shoulder-High, Quick Latch Provides Access to Side Gates
- Priefert Model 91 Headgate or Titan West Automatic Headgate

A Rumber floor provides a stable and sure footing for animals entering the chute. The flooring reduces noise levels, providing a calmer environment for animals entering and exiting the chute.

An easy-to-install Chest Rest is positioned on the chute floor, just behind the headgate, encouraging cattle and calves to stand upright in the chute.

Titan West's unique Crowd Ahead Bar encourages animals to continue moving through the chute.
